

Let's have some fun?

*“Practice and repetition lead us to perfection, or at least, closer enough”.*

---

Here are the answers

1) Where does the video take place?

The answer is: The Solomon Islands

2) What did the divers see?

The answer is: Blue bioluminescent lights

3) What type of fish did the divers encounter?

The answer is: Flashlight fish

4) Why don't the fish come out when the moon is out?

The answer is: They are very sensitive to light.

5) How do the fish glow in the dark?

The answer is: They grow bioluminescent bacteria under their eyes.

6) Why do the fish keep their light on while they eat?

The answer is: So they can see their food.

7) How many fish move in a school?

The answer is: A quarter of all fish species

8) What are the benefits of schooling?

The answer is: The fish are safer in a big group because it is harder for a predator to zone in on one specific fish.

9) What is a "blink and run"?

The answer is: When the fish start swimming in one direction, blink, and then immediately turn in the other direction to evade a predator.

10) What does this recording prove?

The answer is: It is possible that the deep sea contains billions of bioluminescent fish.
